Agile Learning Guide

Agile Recommended Curriculums

This guide will help you navigate the three Agile Learning Programs we have available in DXC University.

Agile Basics

This covers basics in Agile for all roles and forms the basis of all our other learning programs.

How to Enroll in Agile Basics Learning Program in DXC University:
Click here and click on "Enroll"

Agile PM10 (PMI-ACP & ScrumMaster Aligned)

This is the curriculum of courses that support the Agile PM10 assessment and learning framework for program and project managers. It is a blended program of self-paced and instructor led sessions.

Currently, 1-4 levels are available.

How to Enroll in an Agile PM10 Learning Program in DXC University:
Click here, click on the level of your choice on the left and click "Enroll"

Agile Software Development Practitioner

This series of 6 self-study Agile courses introducing Agile Software Development and how to identify and manage projects. This group of courses also includes a Scrum Overview and the process around the Scrum meetings.

How to Enroll in Agile Software Development Practitioner Learning Program in DXC University:
Click here and click "Enroll"

Certifications

Scrum Master Roadmap

There are a number of recommended scrum master certifications; the roadmap is a useful picture of how to build your knowledge to achieve one of the scrum master certifications. **Click here** to see details.

Supplemental Agile Resources

Join the **Agile DXC Community** for more support from professional Agile Coaches & peers across the DXC!
Note: Legacy CSC Employees will need to request access to this link.
